Darkness Will Cover County During Eclipse

Total Eclipse of Sun Occurs Saturday Morning—Will Not Occur Again In One Hundred Years—Ulster County in Center of Eclipse Belt Which Is Not Visible Throughout All of United States.

Ulster county will be in the center of the belt of darkness resulting from the total eclipse of the sun which takes place on Saturday morning of this week. The central line of the eclipse passes very close to Ellenville, and the total eclipse extends as far north as Saugerties.

The New York State Department of Education has issued an interesting bulletin prepared by Prof. Caroline E. Furness of Vassar College, concerning the eclipse and its importance, and various scientific societies have made extensive preparations for taking observations.

The bulletin of the State Education Department says:

The school children of a large section of New York State will have a rare opportunity on Saturday, January 24, of seeing a total eclipse of the sun. The sun will then be hidden from us by the dark body of the moon, and instead of the brilliant orb of day in the heavens, we shall see a black circle surrounded by a pearly halo of light, called the corona. This wonderful halo, so delicate that it can not be seen at any other time, makes a total solar eclipse of great importance to astronomers, who undertake long and expensive expeditions to remote parts of the world to observe it.

A total eclipse of the sun can be seen only in a very restricted area, although a partial eclipse is visible in a much larger region. None has occurred in this part of the United States since 1806, when one was observed in Boston and its vicinity. The next following one visible in this part of the country will be in 2024, and will be seen in New York state although its exact location has not yet been calculated.

Since a total eclipse of the sun is so important, and is such a wonderful sight, every one who lives within traveling distance of places where it can be seen, should know the circumstances, so that he can select a suitable spot from which to view it. He must also know what to expect, so as not to lose even a second of the precious time of totality, which lasts in this case two minutes or less. Some suggestions covering these points will be given in this article.

Where to Go.

A total eclipse of the sun is caused by the passage of the moon between the sun and the earth in such a way as to cast a shadow on the earth. Under certain circumstances the eclipse will be total, under others, only partial. During total eclipse, the shadow of the moon at any moment is approximately round. It traverses a long and narrow track across the earth which is called the path of totality. Its width at the maximum is about 110 miles, and in the present case is about 110 miles. Hence every one within a distance of 55 miles of the central line of totality will see the eclipse, but it will not last for the same length of time for every one. The duration will be greatest at the central line, and will diminish to a few seconds just within the edge of the shadow. Hence it is important to know just where this central line lies.

In the eclipse of January 24th, the central line enters New York state at Buffalo and passes very near to Warsaw, Watkins, Otego, Binghamton, Ellenville, Newburgh and Fishkill. It leaves the state at Carmel, crossing into Connecticut where it passes over New Haven, and thence across Long Island and out to sea.

In selecting a place for observation, certain other facts must be taken into consideration as well as its nearness to the center of totality. The most important ones are the direction of the sun and the state of the atmosphere. Too much smoke or mist will almost obscure the corona. In this case, unfortunately, totality occurs shortly after 8 o'clock in the morning, Eastern Standard Time, and in consequence, the sun, which does not rise until about 7 o'clock, will be rather low in the southern part of the sky. The best place for observation will be a hill-top cleared of trees, with nothing in the habit of watching the sun and being able to tell where it will be on any particular day of a given time in the morning. It happens that the sun will be just as high on January 24th, and its path across the sky will be nearly the same as on the day of the eclipse, but there is a little difference in the time the sun rises. That however, will not interfere with the selection of the place of observation. Therefore, on November 19th, visit the selected spot and find by actual observation whether it is favorable for watching the sun from

7:30 o'clock to 10:30 o'clock. Such a preliminary study may well be made by the boy scouts.

What To See.

On a scientific eclipse expedition, the astronomers take along several different kinds of apparatus for making observations, but very interesting phenomena can be seen without a telescope. Any school child who has been trained to notice carefully what goes on in the natural world can make observations which will be very instructive and always a pleasure to remember.

First of all, each one must have a piece of dark or smoked glass. Under no circumstances should any one attempt to look at the sun before the time of totality without some such protection for the eyes. Glass can be smoked very well with burning camphor. Experiment with a little beforehand in order to get just the right density. Then fasten a piece of clear glass against the smoked surface to prevent rubbing. Some persons recommend the use of a photographic film or plate which has been fogged and then developed. Be sure to have it ready in advance.

A lantern should be taken along, because it sometimes grows quite dark during totality, and artificial light is necessary if any records are to be made. Take a good watch or clock set to standard. Field glasses or a spy glass or a small telescope will add very much to the pleasure of the observer. Provide yourself also with a notebook for drawings and notes, and also a good sized piece of cardboard and a sharp stout needle for piercing it. If there is no sand on the ground, take also a large white cloth such as a sheet or bedspread.

Equipped with all of these articles, go to the chosen spot well in advance of the time of the beginning of the eclipse. It will be impossible in this article to state exactly what this time will be for any given locality, except for those published in the Nautical Almanac. At Buffalo, partial eclipse begins at 7:59 o'clock, and ends at 10:22 o'clock, while the middle of totality is at 9:07 o'clock, and the duration is 1.5 minutes. For Ithaca and Geneva the times are 8:00, 10:26 and 9:10, while the duration for Ithaca is 1.3 minutes and for Geneva 1.5 minutes. For Poughkeepsie the corresponding times are 8:01, 10:20, 9:12 and the duration 1.9 minutes. All of the times are Eastern Standard.

Too much emphasis can not be placed upon getting everything ready beforehand, as well as having the mind prepared for the event. Everything will happen on schedule time, and there will be no opportunity to go back and get something left behind.

The first thing to note is the beginning of the eclipse. Watch the sun with the dark glass, and at the predicted time a small dent will appear on the upper right-hand edge of the sun, caused by the moon. Note the exact time when it is distinctly visible. The dent will grow larger minute by minute until the sun looks as if a bite had been taken from it. Soon more than half the sun will be covered, and it will appear like a crescent, although not exactly the shape of the crescent moon. The crescent will grow smaller and smaller until just before the moment of totality it becomes a mere thread of light.

It is very interesting to make drawings of the partially eclipsed sun. Before leaving home prepare in advance a series of circles about the size of a quarter. Every 15 minutes, noting the exact time, draw in one of the circles the exact shape of the eclipsed edge of the sun. When the eclipse is over, complete the circle of the moon in these drawings and compare its size with that of the sun. It should turn out to be just a little larger.

Take the sheet of cardboard, place it in several places with the needle, and hold it so that rays from the sun will fall on it at right angles. Little images of the partially eclipsed sun will be formed on a paper placed a few inches behind it. In fact all of the spots of light which pass through small openings anywhere about will show crescent-shaped images of the sun. Meanwhile, if there is no shadow on the ground, spread out the white cloth, fastening the edges down with stones. It is not used until just before totality, but have it in readiness.

By the time the sun is half covered, the sky is noticeably darker, but it has a peculiar livid color, unlike that of twilight. It is necessary to use the lantern that will glow and probably go to some extent. There will be a fall in temperature, although this is not likely to be very marked in the winter time. Look toward the sky and you will see a few of the brighter stars and stars near the sun. Venus, Mercury and Jupiter will be in a close group about 25 or 30 degrees to the west of the sun, while Mars, a star of first magnitude, will be about the same distance to the northwest. In the same direction from the sun and above the same group of stars, the star Antares will be visible. The brilliant star Vega will be visible in the east.

Zone Ordinance To Be Reported

Common Council Zoning Committee Approves Ordinance Prepared by Corporation Counsel and Will Submit It to Council at Next Meeting—Public Hearing Later.

The zoning committee of the common council, of which Alderman Urban C. Edinger of the Ninth ward is chairman, met at the city hall Tuesday evening and approved the proposed zoning ordinance that had been drafted by Corporation Counsel James Jenkins, and will submit a report at the next common council meeting asking that a date be fixed for holding a public hearing on the proposed ordinance.

Alderman Edinger presided at the committee meeting with Aldermen John J. Sweeney and Ray Everett. President E. J. Dempsey of the common council, Mayor Morris Block, Corporation Counsel James Jenkins, and others were present.

First of all, each one must have a piece of dark or smoked glass. Under no circumstances should any one attempt to look at the sun before the time of totality without some such protection for the eyes. Glass can be smoked very well with burning camphor. Experiment with a little beforehand in order to get just the right density. Then fasten a piece of clear glass against the smoked surface to prevent rubbing. Some persons recommend the use of a photographic film or plate which has been fogged and then developed. Be sure to have it ready in advance.

A lantern should be taken along, because it sometimes grows quite dark during totality, and artificial light is necessary if any records are to be made. Take a good watch or clock set to standard. Field glasses or a spy glass or a small telescope will add very much to the pleasure of the observer. Provide yourself also with a notebook for drawings and notes, and also a good sized piece of cardboard and a sharp stout needle for piercing it. If there is no sand on the ground, take also a large white cloth such as a sheet or bedspread.

Guess Whose Shadow This Is

President of Holstein-Friesian Association Denies Association Was Ready to Withdraw From State Fair—Talk Will Not Fool Farmers.

Ask for him. That's his business slogan.

Silhouette No. 25 was that of Charles A. Lasher, president of the Kiwanis Club and the Chamber of Commerce.

Van Kleecks Buy Roach Property

John D. and Samuel J. Van Kleeck Buy Property at Washington and Hurley Avenues for Nash Automobile Sales Rooms.

One of the most important realty transactions in the Hightstown section of the city in some time has just been completed. The building at the junction of Washington and Hurley avenues, occupied by Roach Brothers for a leather and hide business for a long period of years, has been sold to John D. Van Kleeck and Samuel J. Van Kleeck, proprietors of the Van Kleeck Motor & Garage. The building of frame construction will be remodeled and made into modern show and sales rooms which will be occupied by the Nash Automobile Company, agents for the Nash automobiles. Possession will be taken on March 1st and improvements will then be commenced.

The Roach building is located at the junction of Hurley and Washington avenues, two of the most traveled motor routes in the city, and is ideally located for a motor sales and service station.

The leather business of Roach Brothers will be moved to 426 Washington avenue, nearly opposite the old location. A two family house which they own will be altered to take care of the business.

Cannon Goes Before Jury

First "Intoxicated Driver" Case to Go to Trial in Ulster County Taken Up in County Court.

The first "intoxicated driver" case to go to trial in Ulster county was taken up Tuesday afternoon in county court when District Attorney Traver moved for trial the case of The People against William P. Cannon. Cannon had pleaded not guilty to the charge and the trial of the action was commenced. Andrew J. Cook appeared for the defendant. Cannon has had other disagreements with the officials while driving a motor vehicle and was once fined by the county court of this county for driving a car while intoxicated. He pleaded guilty to that charge and on a promise to keep away from cars and liquor he was allowed to go. The present indictment charges Cannon with a second offense.

Cannon has been a resident of Ulster county during the summer months, residing at Stony Hollow, during the winter season of the year he resides at New York. This is the first case where a defendant indicted for operating a motor vehicle while intoxicated has stood trial.

Legislature Sets Record

By Telegram to The Freeman.

Albany, Jan. 21.—A new legislative record was set today when three committees report. Never before have committee reports been made so early in the session. Majority Leader John Knight declared, and he pointed to the fact as indication of the brightness of the session.

Will For Bridge To Staten Island

By Telegram to The Freeman.

Albany, N. Y., Jan. 21.—The New York port authority would be authorized to construct a bridge across the Arthur Kill between West New Brighton, Staten Island, and Bayonne, N. J. under a bill introduced in the Legislature today by Assemblyman William S. Hart, Democrat of Richmond. It provides for an appropriation of \$25,000,000 for the preliminary work.

Lowman Talking Bunk, Says Bigler

President of Holstein-Friesian Association Denies Association Was Ready to Withdraw From State Fair—Talk Will Not Fool Farmers.

By Telegram to The Freeman.

Syracuse, Jan. 21.—Farmers of New York state are not being fooled by the efforts of Lieutenant Governor Seymour Lowman to play to the gallery and attract the rural vote by his attacks on the state fair," according to a statement made today by C. F. Bigler, president of the New York State Holstein-Friesian Association.

Mr. Bigler denied a statement alleged to have been made by Mr. Lowman to the effect that the Holstein-Friesian Association had been ready to withdraw from the fair but had been persuaded to remain.

"I'm sick of that 'bunk,' Mr. Lowman is playing to the gallery. There seems to be an idea that he will win the farmers' support and votes but there is no doubt they see through him."

"You can't inspect the finest exhibits of livestock, flowers or vegetables of any fair in the country and then agree the fair is 'mess.'"

"Farmers are too intelligent. At our last meeting less than a month ago we voted support of the state fair commission and particularly recommended reappointment of George R. Fitts of McLean as commissioner in charge of livestock because he has developed the department and worked steadily with real breeders of the state."

Joseph H. Wilson, state budget director, who is investigating activities of the fair commission here for the state board of estimate and control, began calling officials and employees of the fair today in his informal inquiry.

Questioning was behind closed doors but a stenographic record of the inquiry is being made for the board of estimate and control.

J. Dan Ackerman, secretary of the commission, was the first witness called.

He is to be followed by George Schilly, bookkeeper, and Edward J. Shanahan, recently ousted treasurer of the commission.

Mr. Wilson announced the results of the inquiry will be laid before the board of estimate and control and the decision to be made as a result of the investigation will be left to that body.

Edwards Witness Was Convicted

Treasury Department Agent Who Accuses New Jersey Senator of Complicity in Rum Scandal Admits Conviction for Petit Larceny.

By Telegram to The Freeman.

Jersey City, N. J., Jan. 21.—Lionel Wilson, a treasury department agent, who said he saw \$2,500 paid to United States Senator Edward I. Edwards, Democrat, of New Jersey, for 100 cases of Scotch whiskey, admitted today under cross-examination in the Weehawken rum ring trial here today that he on one occasion had been convicted of petit larceny.

Counsel for the government, whose witness he was, announced that it was unknown to them when Wilson gave the Edwards testimony that he had been convicted for such an offense.

The admission created surprise in the packed court room. It was given just after court opened and when George T. Vickers, special government prosecutor, was about to sum up his case against the ten Weehawken policemen, William Griffin accused as director of the alleged rum ring, and another civilian, Harry Stearns, of Weehawken, who are on trial.

George Cutler, of defense counsel, asked that the summing up be halted to permit him to question Wilson. The treasury department agent took the stand. He admitted in answer to a query that he had been convicted on July 12, 1912.

"Were you not arrested for robbing certain boxes of the New York Telephone Company?" Cutler asked the witness and later put the question this way:

"Were you not discharged for robbing certain boxes of the New York Telephone Company?"

"That was in 'the complaint'?" Wilson responded.

"But you were discharged?"

"Yes."

Cutler then moved that the testimony of Wilson and Charles Horne, another treasury department agent, concerning Senator Edwards, be stricken from the record and the jury be instructed to bring in a verdict for the defense.

The lawyer told the court that the grand jury should have known of the identity of Senator Edwards in its investigation. Prior to the actual trial, an "unknown man" was mentioned frequently in the evidence as one of the backers of the ring.

The court overruled Cutler's motion. Word from Washington today indicated Senator Edwards would not come to Jersey City to testify.

State and defense counsel were expected to complete their arguments today by presenting evidence in the case of Griffin, Harry Stearns, of Weehawken, and ten policemen into the jury's hands today afternoon.

Anderson Chafes Under Parole

Served Nine Months of One Year Sentence When Paroled—Now Urges He Be Released From Parole.

By Telegram to The Freeman.

Albany, N. Y., Jan. 21.—A letter written by William H. Anderson, former superintendent of the Anti-Saloon League, who was released from Sing Sing prison the day before Christmas after he had served nine months for forgery, urging that he be released from parole, was received today by members of the state parole board.

James F. Lang, state superintendent of prisons, one of the three members of the board said the board officially would take up Anderson's request at a meeting a week from Friday at Sing Sing.

When released from prison Anderson was placed on parole for 15 months. Under the rules he has to report once each month to the parole board.

While he would not make the letter public, Superintendent Lang said Anderson gave "about a dozen" reasons why he should be released from parole.

"The board doesn't feel it should make the letter public but knowing Mr. Anderson's love for publicity I am surprised he has not made it public himself," said Lang.

George W. Benham of Auburn is chairman of the parole board. Dr. E. E. Larkin of Plattsburg is the third member.

8000 Thinks He Is Martyr.

Yonkers, N. Y., Jan. 21.—William H. Anderson, former state superintendent of the Anti-Saloon League, today sent a letter to the state board of parole asking for "an absolute discharge" from the conditions of his parole.

In the letter Anderson claims that as a first offender he was less favorably treated than a second offender who had entered the prison at the same time.

"As so-called first offender the court in order to get me into state's prison at all was compelled under the law to give me a minimum of at least one year, which carries a maximum of at least two years," Anderson's letter said. "A second offender who entered when I did was given one year 'flat' with no maximum."

"He did not deny the commission of a crime. I did and do deny it. At the end of one year a second offender is discharged and cannot be returned to prison unless convicted of another felony. But for an additional year I am subject to return on mere whim or caprice, or if any charge, no matter how false or trivial, is made against me."

"Your honorable body has power to remedy this injustice in my case. Therefore I respectfully request that at your next meeting at Sing Sing this month you give me an absolute discharge from parole. Respectfully,

"(Signed) WILLIAM H. ANDERSON."

Senate Asks Hughes for Facts

By Telegram to The Freeman.

Washington, Jan. 21.—The senate today adopted unanimously the Johnson resolution calling upon Secretary of State Hughes for complete information concerning the Kellogg-Churchill agreement, signed at Paris whereby the United States becomes an official partner in the Dawes plan in return for 25 percent of the German reparations payments.

The resolution had the unanimous approval of the foreign relations committee which considered it in executive session during the morning.

The resolution asked a copy of the agreement signed by Kellogg, Herrick and Logan together with information respecting the circumstances surrounding the negotiations and execution of the agreement as may be relevant to a full understanding of its terms.

The original resolution sponsored by Senator Johnson, Republican of California, Johnson sought to secure only a copy of the agreement.

This additional information refers then to the much disputed secret treaty which Ambassador Kellogg is reported to have effected just before signing the agreement at Paris. This information is said to have been obtained by the American intelligence service.

Ask Coolidge to Call Conference

By Telegram to The Freeman.

Albany, N. Y., Jan. 21.—The senate today adopted an amendment to the resolution calling upon Secretary of State Hughes for complete information concerning the Kellogg-Churchill agreement, signed at Paris whereby the United States becomes an official partner in the Dawes plan in return for 25 percent of the German reparations payments.

The amendment called for a new call to Coolidge to call a conference of the American intelligence service.

Six Plead Guilty In County Court

Defendants Under Indictment Change Former Pleas—Sentence Suspended on Three—Soldier Faces Charges for Absence From Duty Other Cases.

Six cases were disposed of in county court Tuesday afternoon when defendants under indictment changed their former pleas of not guilty to pleas of guilty.

John McNellis, who had entered a plea of not guilty changed his plea to guilty to petit larceny, a lesser crime, and was sentenced to six months in jail, but the jail sentence was suspended during good behavior and he was placed under the care of the Catholic Guardian Society. McNellis, who is 16 years old, said he was a farm laborer and had no home. He was born in Newburgh and at the time of his arrest was working at Now Paltz. Roscoe V. Ellsworth who was assigned in the case asked the court to show leniency to the defendant. Others are involved in the same case.

Joseph Samara entered a plea of guilty to petit larceny. F. A. Schriver of Middletown appeared for the defendant. Samara is 17 years old. The court imposed a fine of \$50 and a four months' jail sentence, the jail sentence being suspended during good behavior. He was paroled to report through Mr. Schriver to Probation Officer Service at least twice a month for a period of one year.

Albert F. Martin of Jersey City pleaded guilty to driving a car while intoxicated. Judge James Jenkins appeared for Martin. The court revoked any license which Martin may have to drive in New York state and imposed a fine of \$200 which goes to the state, and also imposed a jail sentence of three months in the county jail, the jail sentence being suspended provided Martin pay to the county of Ulster \$100. Martin had \$250 cash bail deposited which was ordered applied on his fine.

Edward Coulin, charged with driving a car while intoxicated in the city of Kingston, also pleaded guilty. F. C. Morrill appeared for Coulin. Coulin has been previously convicted of assault, third degree. He said he kept a store in the city, was 38 years old and temperate.

Mr. Merritt asked the court to defer imposing sentence until Friday and the bond was continued until that time. He will be sentenced at 10 o'clock Friday.

Soldier Faces Military Charges.

Maurice Weinstein, a corporal in the regular army, stationed at West Point, also entered a plea of guilty to the charge of grand larceny as specified in the indictment. Weinstein took a car of Joseph Slater, which was on Railroad avenue, and was arrested down town as he was on his way to West Point. LeRoy Lounsbury represented Weinstein. District Attorney Traver stated that Weinstein had become involved in the law by reason of having partaken of the modern type of alcoholic beverages and until this time had borne a good reputation. The report of the adjutant at West Point was good and in view of the fact that the complaining witness did not wish to see anything harsh happen to the corporal, Mr. Traver requested the court to be lenient. Weinstein was sentenced to three months in the county jail but the sentence was suspended and he is to report to Probation Officer Service once a month for a year. The authorities are willing to take Weinstein back at West Point and in view of the fact that Weinstein has been absent without leave for some time from the service, he undoubtedly will be dealt with in a strict manner on his return. He was held at the county jail until an officer could come for him from the post.

Harold Barrett entered a plea of guilty to the charge of burglary, third degree and was sent to the Clinton State Prison at Dannemora for an indeterminate term, the maximum of which is one year and six months and the minimum one year.

Barrett comes from Orange county and is charged with taking household articles from a residence where he was employed as a watchman. Barrett is the son of a well-known family in the county.

The original resolution sponsored by Senator Johnson, Republican of California, Johnson sought to secure only a copy of the agreement.

This additional information refers then to the much disputed secret treaty which Ambassador Kellogg is reported to have effected just before signing the agreement at Paris. This information is said to have been obtained by the American intelligence service.

to the hungry man, but what a cool disappointment when the "anything goes" gets suddenly and the table looks anything but enticing to a single person. When in doubt as to what to do, use The Free man's "Hole Wanted" Cuts-a-Wind Deodorant.

Dr. Chamberlain On "Young India"

Noted Educator Addresses Monday Club on Conditions in Far East—Beneficial Effect of British Control in India.

The Monday Club met Monday evening at the home of Mrs. G. D. B. Hasbrouck, who presented to the club members and their friends the Rev. Dr. William I. Chamberlain, of the board of foreign missions of the Reformed Church, educator and diplomat, who spoke on "Young India."

Dr. Chamberlain prefaced his lecture by expressing his pleasure at lecturing before the historic Monday Club of Kingston, which he compared with the Fortnightly Club of Tarrytown. He also spoke of the added educational feature of the Hudson valley, namely the noted academies in the cities and towns along its banks, including Kingston.

Dr. Chamberlain's view of Young India was that of one of the "idealistic" Americans. Because of America's idealism she is far better able than some countries to understand the east, in this particular instance, India.

Dr. Chamberlain gave five causes for the unrest in India leading up to what may be called "Young India." The inheritance of intellect, culture and religion in India as against the practicality of the west the natural reluctance of a proud and ancient people to be subject to an overlordship, the intense reactions of the World War, the combining of forces of the Mohammedans and Hindus in common cause against the Allies who according to their ideas have failed to keep their promise to the Kaffir or India, the errors of the British. In connection with the last cause, Dr. Chamberlain said that wherever the British government and people come into control of a subject people for a long period of time, they always leave them politically, economically and socially better off.

Since 1919 there has existed so far as English control of India has been concerned, a sort of diarchy government, wherein England has turned over to India absolutely such matters as education, public works, sanitation and some finance, keeping for the present, control of law and justice until such time as India has so far progressed as to wisely handle these phases of government. In other words, England is assuming a sort of trusteeship of India.

With the massacre at Amritsar, Ghandi, the protector of the weak, was aroused beyond even his wonted gentleness. He said of Afghanistan: "It has a poor government but it is a self-governed country. I envy Afghanistan." and so expressed his ideal that good government was not an adequate substitute for self-government. Dr. Chamberlain spoke at length of Ghandi, whom he almost revered, he said, but showed his one fallacy to be, that having overthrown existing government by force, he had no reconstruction program to offer, nor could he control the vast numbers of ignorant Indians to the extent of keeping their reaction against the government "aloofness."

Dr. Chamberlain closed his address uniquely by showing several Asiatic flags. The first was that of Japan, the solid red ball on the white field. Next the speaker, just in passing, showed a beautiful flag of old China, then that of present China, with its five stripes, black, white, blue, yellow, red; always parallel, never being brought together, so seriously symbols of its people. The flag of Siam showed the red, white and blue, with the sacred elephant in the center, the parallel lines gaining their unity through an animal, not profoundly deep ideas. The flag of Ghandi has embroidered across its stripes of white, red and green, a spinning wheel, indicative of self-support and industry. While that symbolism was counted pretty good, it was not enough, according to the speaker. The flag of Arabia was better, for its white and green stripes were joined by the black triangle of Mohammedanism, terrific, forceful, making for solidarity; a religion nearest ours in its monothelism and humanity.

Japan, Dr. Chamberlain likened to a child newly attending school, bright, alert, interested; China, a child plodding along in the old and dull routine of the old home and school; India, the orphan child, with its appealing eyes turned to the vast sky, utterly forlorn unless America of the ideal practicality can come into sympathetic and helpful contact with her.

Next Monday afternoon at 2:45 the Monday Club will again meet at the home of Mrs. Hasbrouck, when Miss Munn will have her paper on "Problems of the Japanese Government."

Happiness

True happiness is of a tired nature and an enemy to pomp and noise. It arises in the first place, from the enjoyment of one's self, and, in the next, from the friendship and conversation of a few select companions.

Don't Neglect a Cold

Neglect don't let cold get under way; at the first cough or sniffle rub Muterole on the throat and chest.

Muterole is a pure, odorless, made with oil of sweet almond. It drives out congestion, relieves soreness, does all the work of the good old-fashioned mustard plaster in a gentler way, without the blister.

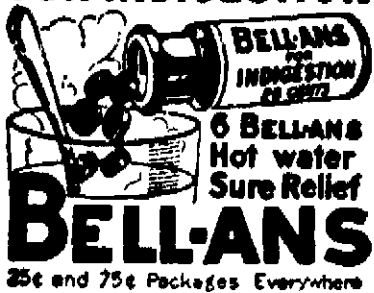

Keep a jar handy for all emergencies. It may prevent pneumonia, your throat.

To Mothers: Muterole is also made in milder form for babies and small children. Ask for Children's Muterole.

25¢ a jar in jars of 50¢ a jar, 10¢ a jar.

Would a hunchback fullback playing quarterback wayback be a drawback or a comeback?

It is remarkable how many doubtful meanings an alleged pure-minded person can find in an entirely respectable joke.

The "graft" of politics and the "graft" of surgery have a distinctly common basis. They're both skin games.

First Child—(As locomotive comes to crossing) I wonder what makes the engine whistle.

Second Child—If your insides were as hot at its are, you would whistle too.

Some men buy all kinds of labor saving devices for their business but won't buy a washing machine or a vacuum cleaner for their wife.

It is twice as easy to become rich as to become respectable.

When a man is young and ambitious he stands and plays for high, low jack and the game. When he gets older he considers himself lucky if he saves his jack.

The musician who plays a bass horn certainly has his hands full.

Some folks never have any use for a newspaper office except when they get into trouble and come around in these phases of government. In the hope of having their names withheld.

One idea of a good interior decoration is a square meal.

"Four balls" means take your base, "Three balls" means take your watch.

"Please could you change this here stamp? 'Taint no manner of use to no one. Father's licked it, mother's licked it, aunt's licked it, we've all licked it, and it won't stay on no-how."

"Do you believe in capital punishment?"

"Certainly," replied the walking delegate for the Dumb-bell's Union, "the working man won't get no justice till capital is punished."

Gladys says that her brother shaved, cleaned up and took a bath last Friday night and declared it felt like Saturday all day.

If Ananias had lived, it would be rather amusing to hear him talk about his golf score.

Bills—Say, old man, you ought to see my new baby. It's a wow!
Jills—Yes, I know, I have one of my own and it's a Wow, wow, wow!

Pock's Bad Boy.

Small Kid: Got any dry fish?
Grocer: Yes, my boy, plenty.
Kid: Then give them a drink.

With a single stroke of a camel's hair brush, Sargeant the painter could change a smiling face into a frowning one.

That's nothing, my mother can do that with the back of a hair brush.

The real movie hero is the man that goes every night with his wife and children.

Matrimony may prolong life and then it may just make it seem longer.

One man whose mere touch makes a woman tingle in every nerve is a dentist.

TODAY WE CELEBRATE

ANNIVERSARIES TODAY.

1793.—King Louis XVI. of France, died by the guillotine.

1812.—John C. Fremont, soldier, explorer, and the first Republican candidate for president, born in Savannah, Ga., died in New York city July 13, 1890.

1834.—James G. Blaine, the famous statesman, born in West Brownsville, Penna. Died in West Newton, D. C. January 27, 1903.

1834.—The emigrant ship "Tayvor" wrecked off the coast of Ireland with the loss of nearly 400 lives.

1861.—Jefferson Davis resigned his seat in the U. S. Senate.

1871.—The Legislature of British Columbia received in favor of joining the Dominion of Canada.

1887.—Interstate Commerce Bill became a law.

DANTI THOMPSON.

Danti Theodore, or Peragla, was born in 1498. She was a profound scholar in the exact sciences, also well acquainted with physics and painting. Never intending to marry, she employed herself in intellectual pursuits and was honored with general esteem. She left an elaborate commentary on Euclid, also a treatise on painting, and several poems of an agreeable style. She died in 1578.

several estates. She left an elaborate commentary on Euclid, also a treatise on painting, and several poems of an agreeable style. She died in 1578.

WILLIAM HOBENZOLLERN SIXTY-FIVE TODAY

About ten years ago—in fact as late as seven years ago—a certain gentleman of Central Europe had a four by six visiting card inscribed, "Wilhelm, Deutscher Kaiser und Konig von Preussen," well, today his visiting bill has been reduced considerably, for the card now is printed just plain "William Hohenzollern" now a private citizen mingling with the good burghers of the land of the dykes. The ex-kaiser was born January 20, 1864—by the way, for those who have a penchant for astrology—this date falls on the last day of the Zodiacal sign "Capricorn"—The Goat (Not and) further, more natives of that sign are ruled by Saturn—called "The Greater in Misfortune." Speaking of the signs reminds one of all the "signs" the former ruler of Germany used to wear on state occasions as he was the most decorated personage in Europe—among the decorations by Bismarck in the "good old days" were the British Order of The Garter—(It pays to advertise), the Italian order of the Association, the Norwegian order of the Lion, the Spanish order of the Golden Fleece, the Russian order of the Elephant, and the Russian order of St. Andrew. ("Vanity of Vanity—all is vanity.")

Louisiana Pudding

THIS is a satisfying dessert—just right to serve with light dinners.

Don't tell the folks what the dessert is going to be. Just say something from New Orleans!

Mix 4 cups milk; 1/2 cup Brer Rabbit Molasses, 1/2 cup washed rice, 1/2 cup raisins, 1/2 teaspoon cinnamon, 1/2 teaspoon salt. Stir thoroughly. Bake in slow oven about 2 1/2 hours, stirring 4 times (every fifteen minutes during first hour) and add 3 teaspoons butter on fourth stirring.

In Brer Rabbit you have it—real, old-time sugar cane molasses.

Pure and rich in the mineral salts doctors say we need. Like milk it is rich in calcium and like spinach it is rich in iron.

Two grades—Gold Label for table use and fancy cooking; Green Label, a somewhat stronger flavored molasses for general cooking.

Brer Rabbit Molasses

KINGSTON, N. Y., JAN. 21, 1925.

Those desirous of a ripe old age are recommended after 50 to take less food, drink more water, take a rational amount of exercise, get eight hours' sleep every night, and keep "a contented mind which casts off worry." The hardest of these to accomplish are eight hours' sleep and a contented mind—for the old sleep lightly as a rule and are apt to be troubled both with regrets for the past and doubts as to the future.

"FIGHT PROMOTERS."

The determined effort of some of the legislative correspondents to have a wide open split in the Republican organization, and a fight so bitter that the breach will never close or the wounds heal, is interesting. It shows the big part imagination plays in the daily tasks of the workers along the midway of the Capitol. It also gives an excellent idea of how many words some can use without saying anything that means anything. Of course, some of it, not much, however, is entertaining, and it is what is known as one-edition stuff, matter that, when anything comes along which is worth while, is thrown into the dump.

During the past week or more, in fact, since the senatorial contest ended, there has been a persistent disposition to convince the people that Senator Wadsworth, State Chairman Morris and one or two others are lined up in battle array against Lieutenant Governor Lowman and his friends, the objective being to get or retain control of the Republican state organization. The stories have been built on the flimsiest of pretenses, the reasons given being farcical. Some of the correspondents have placed Senator Fearon at the head of a war group, and a million other groups, in the Senate to attack dry senators with Lieutenant Governor Lowman as leader. The truth of it is that every means has been used, but unsuccessfully, to support a fight story.

Very recently some of the more persistent of the "fight promoters" tried with a series of questions to get admission from this man and that man which would assure a fight between the various leaders, and a fight, naturally, to the "bitter end." Of course, most of the fight material was printed in Democratic papers. Nevertheless, there has been no war, nor is there any danger of a war, according to what Chairman Morris says and what Lieutenant Governor Lowman says and what everybody else says who would be in any way concerned but who have no intention of warring with anybody, particularly when there is absolutely no cause for an offensive at any time or in any place. But on dull days fiction is entertaining and Monday is a good day for romances.

READY FOR BUSINESS.

Ever since Governor Smith took office there has been more or less discussion relative to the future of the large canal. There was gossip, and tons of it, that the Governor was not friendly to the waterway and that his superintendent of public works, Mr. Greene, was also unfriendly to the inland route. It may be remembered that meetings were held, one in Syracuse and one in New York, to dispose, and for all time, of the rumored opposition to the Canal system of the Governor and his subordinates.

The fact is, however, there is a canal extending from one end of the State to the other that cost millions of dollars to build. Notwithstanding those who did not accept it as something that would bring to the people a return on the investment, former Governor Nathan L. Miller took a trip about every inch of it, after which he said there was not reason why the canal should not become one of the great factors in solving the problem of transportation, the biggest problem before the people. The former governor colored upon what the canal would do as a means of reducing the cost of living, and he is one of the most ardent supporters, having been quoted recently as saying he had no more yet to change his mind as to the increasing value of the waterway.

That the obstacle in the development of the canal is not the canal but in the management and operation of it is the opinion of State En-

gineer Roy G. Finch. Engineer Finch says there is no valid reason why the canal, as a line of transportation, is not a definite success. The depth is there, the facilities and possibilities are there, and Mr. Finch says the canal this very minute is ready to do business. It is now a matter of getting boats to ply its water from New York to Buffalo, and of course beyond those points.

That Body of Yours

YOUR IDEA OF EXERCISE.

I spoke once before about an acquaintance, who watching a dog stretch himself after a sleep, thought that it looked like a good proposition. Despite his age—about sixty—he began stretching over and touching his toes a number of times daily. In addition to this he took three or four minutes exercise every day.

He found that he was becoming pliable, and that he had lost that stiffness that had been with him for nearly ten years.

You may notice that you sit down more frequently than you formerly did, that you ride where you walked previously, and that except for a little golf in the summer, you are not really getting any exercise whatever.

Now there is something about the word exercise that may simply "get" you.

You hate it worse than the word "work."

With work you are really doing something definite, something that can be seen, and that may be of some use in the world.

But exercise, simply moving the muscles as in calisthenics, or free hand exercises, seems so useless, almost foolish to you.

And yet you are clothed right from your head to your feet with masses of muscle.

There are nearly five hundred muscles in the body, and they have only one job, that is to shorten themselves and thus do some work.

If the muscles on the outside of the body were not meant for use, then you might just as well have a nice layer of deep fat all over you, covered by your skin.

There would be nothing with which to bend the body forwards, backwards, nor sideways.

If you give these muscles such a little bit of exercise that only parts of them move, or all parts move a little, then like any other unused or slightly used part, it will lose its elasticity and you become "stiff" and "old."

Further you can bend your body in every direction a few times daily, and you will keep the muscles pliable. You can do this at any age. Of course the best exercise is always a game where you move every muscle in every direction, and put the vim into it, because you enjoy it. That is ideal. But that can't always be done, or you may be past that stage.

Then a few bending or stretching exercises will keep the muscles pliable, until you reach the allotted span.

If you are willing to walk a little distance every day, you will develop those two vital centres, the heart and lungs completely.

OVER 800 LEAGUE MEETINGS ON JANUARY 31

Annual meetings of locals of the Dairymen's League Cooperative Association, Inc., will take place on Saturday, January 31. Over 800 locals in all parts of League territory will convene during the day. Five directors will be elected by the members of each local. Each board of directors in turn will elect a president and a secretary. A roster of membership consisting of milk producers, who have signed the pooling contract and also the local association's by-laws, will be made up at each meeting. A certified list of the members will be forwarded to the parent association.

WHY

Scientists Must Capture Sunlight Energy

Energy from the sun pours on every acre of ground to the equivalent of 1,476 tons of coal during an average 99-day growing season. Of this wealth of power a crop of wheat yielding 30 bushels to the acre, a very high figure, puts into the bin an energy equivalent of less than two-thirds of a ton of coal. These striking figures are given by Dr. H. A. Spoehr, plant physiologist of the Carnegie Institute coastal laboratory at Chermal, Calif., writing in the annual report of the Smithsonian Institution. But inefficient as plants are, Doctor Spoehr points out, they have been the only means of major importance we have had for capturing solar energy and making it available for man's use. The coal and oil deposits, representing the sun power captured during long periods and stored ages ago, are being used thousands of times faster than they were originally made. Plants, in Doctor Spoehr's opinion, do not hold much promise of effective usefulness for supplying solar energy after coal and oil are exhausted. They cannot work fast enough, and besides, plant production must be increasingly used to supply food and little can be spared for fuel. Man must use his ingenuity to devise means for the direct capture of the great quantities of sunlight energy that daily waste themselves. Little progress has been made so far, but Doctor Spoehr is confident that when the problem is attacked in earnest by scientists it will eventually be solved.

Why Montana Buffalo Herd Must Be Thinned

Between 200 and 300 buffalo on the Montana national bison range west of Missoula, Mont., must be slain, Francis Rose, the superintendent, announces, according to an Associated Press dispatch. A census last summer showed 500 elk, 28 mountain sheep and 100 deer on the range, and an inspection of the grasses convinced the superintendent that the preserve was 40 per cent overstocked.

The sale of buffalo to parks and zoos is not great enough to bring the herd down to the required size and so a large number will be slaughtered and sold on the meat market. Each year the herd is reduced in this manner, but this year a far greater number than ever before will be butchered.

The Montana buffalo herd is the third largest in the world. The range, containing 18,000 acres, is under the supervision of the United States biological survey.

Why Leaves Change Color

Certain leaves change color regardless of attack by frost. Coloration indicates a dying condition of the leaves. This condition may set in at almost any part of the tree and may occur very early in the season due to drought or disease or injury of some kind. There is no set rule in what part of the leaves the color first appears. In fact, some leaves start at the tips, some along the midrib and some are mottled. In the normal course of coloration you might reasonably expect the oldest leaves on the terminal branches to color first. The scarlet oak holds its coloration last. The weeping willow and elderberry remain green until the leaves are drying; the chlorophyll is not taken back into the trunk.

Why Rust Is Encouraged

Iron staircases in the library of the British museum were recently treated to a coat of rust to make them less slippery and thus protect the library workers. This is believed to be the first instance on record where rust, instead of being fought, was deliberately sought after. Long use had made the iron steps of the library stacks so slippery that shelf attendants carrying heavy loads of books up and down them were constantly risking their necks. The British office of works sent engineers to remedy the evil, and they did so by applying a chemical treatment that left a rough-surfaced coating of rust on the iron. After several months of use the objectionable slipperiness had not returned.

Why Sun's Heat Differs

The naval observatory says the earth is heated by sunlight in the same way as a room is heated by sunlight coming through a window pane, while the pane itself remains comparatively cool. Similarly, a greenhouse often becomes insufferably warm within on a clear, cool day. The explanation is that both air and glass are transparent to sunlight or, in general, to radiation from any incandescent source, but are opaque to radiation from objects at an ordinary temperature. The atmosphere may be called a "transparent blanket," which lets in the sunlight but will not let out the heat.

Why Light Is Inefficient

"Cold" light from the practical standpoint of illumination will not likely become a commercial utility, according to Elliott Q. Adams of the Nela research laboratory of Cleveland. The glow from phosphorus and the light of the firefly, he said, are most inefficient as light. Light may be spoken of as "cold," only when it is emitted by a source of low temperature and when the proportion of incandescence radiation is small, which is true with the firefly in both instances, but this he says does not mean that the luminous efficiency is high. Most sources of light are at very high temperatures.

City Lights Will Burn in Darkness

Street Lights Will Be Turned on Saturday Morning When City Will Become Dark From Sun's Eclipse.

The Kingston Gas & Electric Company is preparing to handle an expected increased load on Saturday during the eclipse of the sun by having generating equipment ready to supply whatever demand is made on it plants.

According to C. A. Lasher of the Electric Company, the time at which the eclipse is scheduled to occur ordinarily finds the generating equipment delivering energy at a peak. The heavy industrial load is on and in the homes it is the time when household electrical appliances are ordinarily in use.

The eclipse falling on Saturday, it is not expected there will be so much of the domestic power load to handle and even if it were wash day or ironing day, it is likely that housewives would suspend operations long enough to witness the eclipse.

It is expected that many thousands of electric lights will be turned on during the period of darkness, thus throwing much of the evening lighting load on to the morning power peak. If the day is cloudy, the darkness will be greater and with no opportunity to see the eclipse, it is expected that virtually the entire evening lighting load will have to be handled.

"It is one of the aspects of our business which we are constantly facing, that of meeting the fluctuating demand," said Mr. Lasher. "We cannot store up our product against an unexpected demand and we must be prepared for whatever happens. When we take on customers, we must have plant capacity to supply them. Under ordinary conditions we know from experience when the 'peaks' occur. Whether the eclipse will make a great deal of difference in the load we cannot foretell, but at least we are prepared to meet the situation when it comes."

The Kingston Gas & Electric Company has sent word to the local authorities that in the interests of public safety, if it is desired to burn street lights during the eclipse of the sun on Saturday, the company will be glad to cooperate, waiving restrictions that may apply to the use of street lights during daylight hours.

In some localities it has been decided not to have street lights burn because of a desire not to detract from the wonder of the phenomenon. In other places where there is a fear that thieves may take advantage of the darkness, or that accidents might occur in handling traffic, it is proposed to light the streets during the period of the eclipse. Whatever the authorities decide will be satisfactory to the electric company.

Girl of Fifteen Kills Her Visitor.

ANGELINA MANNING.

Fifteen-year-old Angelina Manning, of Cleveland, Ohio, swore she would kill the man she declared had betrayed her. So on Tuesday, twenty-four blood-chilling words with her and her mother in their home, she drew a revolver and shot him five times, killing him instantly. Her mother corroborated her story.

ITALIAN PREMIER IN LION'S DEN

Here is an unusual photograph of Benito Mussolini, Fascist Premier of Italy, secured recently in a lion's den. He is seen declaring that he has been figuratively in a political lion's den. The lion was provoked as a cub to Premier Mussolini, but it has now grown too large to keep in his home, so the Premier goes in a daily visit to the Zoo in Rome and plays for some time with his jungle pet.

Would You Use?

The unsharpened blade with the rough edge—or the sharpened blade with the keen edge? A sharpened blade gives a perfect shave. Valet Auto-Strop Razor blades are always sharp.

BEWARE THE
COUGH OR COLD
THAT HANGS ON

Chronic coughs and persistent colds lead to serious lung trouble. You can stop them with Creomulsion, an emulsified cod liver oil that is pleasant to take. Creomulsion is a new medical discovery with twofold action: it soothes and heals the inflamed membranes and kills the germ. Of all known drugs, creosote is recognized by the medical fraternity as the most healing agency for the treatment of chronic coughs and colds and other forms of throat and lung troubles. Creomulsion, in addition to creosote, other healing elements which soothe and heal the inflamed membranes and stop the irritation and inflammation, while the creosote goes to the stomach, is absorbed into the blood, attacks the seat of the trouble and destroys the germs that lead to consumption. Creomulsion is guaranteed satisfactory in the treatment of chronic coughs and colds, bronchitis, catarrhal bronchitis and other forms of throat and lung diseases, and excellent for building up the system after a cold or flu. Money refunded if any cough or cold, no matter how long standing, is not relieved after taking according to directions. Ask your druggist. Creomulsion Co., Atlanta, Ga. (Adv.)

ARMENIAN BUILDS COMPLETE AUTOMOBILE

Bagov A. dadian, fourteen-year-old refugee orphan in the Near East Relief industrial school at Alexandropol, Armenia, has just built this complete automobile. It stands about three feet high and resembles a hand-made narrow gauge model of a runabout. The makeshift car is in no sense an assembled affair, as practically all parts were made by hand. It's one-cylinder engine, transmission, steering apparatus, two gears, rope tires and mudguards are mysterious and ingenious.

STEERING CLEAR
OF CAR TROUBLE

Plenty of Oil and Grease,
Tight Joints and Alignment
Are Needed.

(By ERWIN GREER, President Greer College of Automobile Engineering.)
The motorist who neglects to inspect, lubricate and tighten the various parts of his car is either lazy or reckless. And sooner or later something happens. Then—

The steering gear of an automobile comes nearer to being standardized than any other part. With reasonable care it will outlast all the other working parts. But for safety's sake the front tires should be always inflated, the joints well lubricated, every part kept tight, and proper wheel alignment.

How to ascertain these conditions? First, some elbow grease!

Locate Loose Connections.
To locate loose connections or worn bearings, jack up one wheel at a time, grasp the tire with both hands, and work the wheel back and forth, noting what places have play. Naturally, you will expect to find some looseness in the ball-and-socket joints, on the drag-link between the steering arm and the knuckle joints for these must be free to move, but there shouldn't be any play in them. A little looseness in each joint will cause a lot of play in the steering wheel.

The upper bearing of the steering post should be given a few drops of oil every thousand miles. The steering wheel should always be kept tight in its tube.

The worm-gear and ball-arm only need occasional oiling. A "shot" from your grease-gun every three months is enough. Above and below the worm-gear are the thrust-bearings. These must always be kept tight. If the steering gear is of the full worm type the worm can be turned a quarter circle, provided the eccentric bushing will not keep it in proper adjustment.

Lubrication Required.
The drag-link requires lubrication at the ball socket on each end. Grease or oil them every five hundred miles. Keep the ball sockets tightly adjusted, but not too tight, as they might bind in certain positions.

The spindle tie-rod requires lubrication and adjustment only at the forks at each end, but these should be checked once a week for alignment. If they are bent it will throw the front wheels out of line, wear the front tires, and make steering extremely difficult. The steering knuckles also require oiling every five hundred miles. These should be kept just tight enough to prevent lost motion, but not tight enough to hinder their turning freely.

Ordinarily the front-wheel bearings need tightening and adjusting about once a season. The wheels will seldom wobble of themselves. However, if the demountable rims are not put on properly the tire cannot run true. This also causes hard steering and wearing away of tires.

Summed up, the foregoing shows: Plenty of oil and grease, tight joints and proper alignment. If you can't do this work yourself get your service station to do it for you. And then you won't be listed in the newspapers under the head of "Accidents."

Valve Springs
If the springs of the exhaust valves become weak from use or heat the pressure will draw burnt gases into the cylinders, past the valves with the incoming gasoline charge, giving an improper mixture. The valve springs should be tested occasionally to see if they are of full strength. The average strength of a valve spring should be 30 pounds. At high engine speed the exhaust valves nearly always get out some leakage.

Closed Cars Increasing
The production of cars and trucks in 1923 reached the enormous total of 4,044,000; pleasure cars, 2,644,000; trucks, 2,200,000. This was a 10 per cent increase over 1922, during which year 2,600,000 automobiles and trucks were produced. Thus, five per cent of the production of 1923 were closed cars.

Mark Comparison
A person who takes no interest in his car is like a man who takes no interest in his money. A car is a machine that should be kept in good condition. It is not worth talking about—Tire Company.

Beauty Of Hair and Skin Preserved By Cuticura
Cuticura is the best skin and hair preparation. It is not worth talking about—Tire Company.

Palestine Farmers Ask
Wall Street Aid.

Joseph Saphir and David Sternberg, young Jewish farmers from Palestine, have reached New York to ask Wall Street financiers for financial aid for B'Nai B'rith—the young Jewish farmers' union in the Holy Land. Both served through the World War. Sternberg was first sheriff of Samaria and joined the British forces when they took Samaria.

News Item in Southern Exchange—
"The Rome Hosiery mill has put on a night shift to fill large orders coming in for the last several weeks."—Boston Transcript.

Change in Nature's Law
There is nothing in the world that remains unchanged. All things are in perpetual flux, and every shadow is seen to move.—Ovid.

Brute
Lady—My husband is a deceitful wretch. Last night he pretended to be here when he knew I was lying to him.—London Mail.

Take Oath in Welsh
Ten of the twelve members of a jury that tried an English prisoner at a court in Carnarvonshire, Wales, took the oath in Welsh.

Tear Gas Will Warn
Motorist of Danger

A former officer of the chemical warfare service has suggested the introduction of a drop or two of tear gas into the carburetors to prevent deaths from carbon monoxide poisonings in garages. The tear gas, discharged through the automobile exhaust, would warn the motorist warning up his engine if the air was becoming dangerously impregnated with the deadly carbon monoxide. When the motorist began to cry he would know that it was time for him to leave.

Lubricants May Thicken
During Severe Weather

Lubricants throughout the car will, of course, all be somewhat thicker in cold weather, but if the usual care is taken to see that the various parts are properly lubricated no trouble will be experienced on this point.

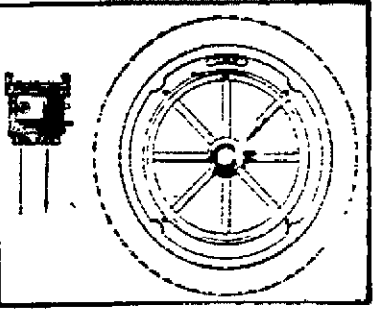

The only other mechanical features requiring special attention are the brakes and the steering gear, which should be checked over carefully, since these important parts are called upon for severe service during the rough winter going. The possibility of the brakes freezing tight after a hard ride in heavy slush going must be borne in mind.

The ordinary precautions for satisfactory tire service also demand special attention in cold weather. Water will work into small holes or cuts and, freezing, rapidly split them, increasing their size to a dangerous degree. All small holes should therefore be carefully plugged up to obtain maximum tire service.

Demountable Rim Easily
and Quickly Detached

The Scientific American in illustrating and describing a demountable rim, the invention of G. Knowling, Jr., of St. John, Newfoundland, says:

This invention has reference more particularly to means for locking the rim on the wheel body. An object is to provide a simple demountable rim which can be easily and quickly removed from the fixed rim and another detachable rim substituted therefor.

An Elevation of a Wheel Provided With the Demountable Rim, and a Cross Section.

A further object is to provide a demountable rim which is equipped with locking wedges normally retained in position by yielding means and which wedges prevent an axial movement of the demountable rim on the wheel body.

Valve Grinding Made Hard
In some overhead-valve engines valve grinding is made a harder task than it should be, because when the valves are removed the owner dismantles the rocker arm assembly. In most engines this is not necessary, because the rocker arm can be disconnected from the vertical rod, pushed one side and the valve removed. In engines using cages, this is particularly easy, though most owners go to the trouble of dismantling the rocker arm assembly. To push the rocker arm aside use a flat screw with a pair of pliers at one jaw to twist with.

Straighten Bent Axle
A method of restoring a front axle which has been bent, says Automobile Engineer, is to take two lengths of 4 by 4-inch joint just long enough to reach from the upper side of the axle outside each spring plate to a cross timber at the end of the spring or end of the frame. Then if a jack is placed beneath the axle at the bend enough pressure may be applied by means of it to force the axle back into shape.

Legal Punning

By this is not meant punning which is legal—for there is no pun that the law authorizes—but punning by members of the profession which calls itself legal.

A judge in New York was listening patiently to an argumentative conflict over the amount of a fee claimed by a counsel. At the close of the contention he remarked:

"Let me have your papers and the affidavits of the expert, and I will see what is feasible as to the fee, and will endeavor to see my way clear to a just solution between the contention on the one side that the fee is a phenomenal one, and on the other side that there should not be a nominal fee."

Common Street Names

High street is the name of the principal street in almost every small town in the country. Here, again, few people are aware that in this case "high" does not mean raised, but merely "chief." Its meaning is the same as Main street, so popular in America.—London Tit-Bits.

Putting Eye in Needle

In 1826 a stamping machine was used for the first time to drill eyes into needles. The needles are fed into a machine which forms the flats of the eyes, which are then driven through by a punching machine. The processes for manufacturing needles are in excess of 20.

BURKE'S

25 Seconds
will tell you why Chipso
saves your strength

WE know what washday has meant for you. That is why we have made Chipso.

Chipso is quick suds. (No powder or lumps to make you sneeze; no shaving, no melting of cake-soap to waste your time.)

Twenty-five seconds from package to tub, and you are ready with a veritable mountain of cleansing bubbles—this is Chipso's magic new welcome to your clothes, and its kindness to your arms and back.

These tiny sprays of cleanliness find dirt and soil and carry them away from every fibre of your fabrics. Yet to the fabrics themselves, and to the colors, they are friendliness itself.

With Chipso your next washday will be different — a day of surprises — happier, pleasanter, shorter.

ECONOMICAL
For this new kind of washday, whether you wash by boiling, soaking, or machine, Chipso and water are all you need. And the cost is merely that of ordinary good laundry soap. Chipso gives its extra advantages FREE.

Your grocer has the blue-and-orange packages of snow-white Chipso in two large sizes—and such value in these packages! Prepare for a Chipso washday now.

PROCTER & GAMBLE

Chipso

Many Watershed
Forests PlantedGlens Falls Will Plant 300,000
Trees This Year—Other Cities
Making Plantations—New York
City's Work in Catskills.By Telegraph to The Freeman
Albany, Jan. 21.—The city of
Glens Falls has placed an order with
the conservation commission for
200,000 young trees for planting the
coming spring as a part of its municipal forest.

About fifteen years ago shortly after the state began the distribution of young forest trees on a large scale, the city of Glens Falls decided to grow forests on its watershed for the better protection of its water supply and in 1910 planted 60,000 white pine, 5,000 Scotch pine and 25,000 Norway spruce. Subsequent plantations were made from year to year until at the present time more than 800,000 trees have been set out by the board of water commissioners. When the trees ordered this year have been planted, the city will have a forest of more than a thousand acres that at maturity will yield a valuable crop of timber and in the meantime will protect its water supply. The Glens Falls forest includes some of the finest plantations in the state.

The Oneonta City Water Department has ordered 50,000 trees to add to its forest on the city's watershed where nine plantations already have been made primarily for the protection of the city's water supply and ultimately for a supply of timber and wood. With this year's plantation the forest will contain over 300 acres.

The village of Carthage, Jefferson county, which has been reforesting its watershed in the town of Croghan, Lewis county, since 1910, has placed an order for 100,000 trees for planting this year. With one exception this is the largest order for trees ever placed by the village which has adopted the policy of planting trees on its watershed until it is completely reforested. Starting with a plantation of 6,000 trees in 1910, the village has been steadily increasing its reforesting work until with this year's planting it will have a forest of more than 650 acres of young trees.

The board of water commissioners of Gloversville which began the reforesting of the city's watershed in 1911 and has been making plantations ever since, will plant 15,000 more trees this year and the city of New York, which has been doing extensive reforesting on the city's watershed in the Catskills, has ordered 39,000 trees for spring planting.

OUR DAILY PATTERN.

A New Doll Set.

4196. The little doll mother may not only make dolly's clothes but also the doll, from the models supplied herewith. The body may be of drill, unbleached muslin, oil cloth or canvas, with a stuffing of bran, kapok or cotton. Eyes of shoe buttons, nose and lips of yarn, or the features may be embroidered or painted.

Dressed as a clown this doll will be very attractive. The suit may be of calico, cretonne or scraps of silk or satin. One or two colors of materials may be used. For the rompers—cretonne or gingham is pleasing. Dolly will be so glad of the dear little pockets in her rompers, and "Pierrot," the clown, will do all sorts of tricks in his comfortable costume. If his arms and legs are fastened so as to be movable.

The pattern comprising the doll and the garments is cut in 3 sizes: Small, 12 inches; medium, 18 inches; large, 24 inches in length. The doll requires for a medium size 1/2 yard. The rompers 3/4 yard. The suit and hat, 1 1/4 yards of 27 inch material.

A pattern of this illustration mailed to any address on receipt of 12c in coin or stamps by the Pattern Department, The Freeman, Kingston, N. Y. Be sure to state the size wanted.

Fashion Book Notice.

Send 12c in coin or stamps to The Freeman for our up-to-date fall and winter 1924-1925 Book of Fashion. Showing color plates, and containing 200 designs of ladies', misses' and children's patterns, a concise and comprehensive article on dressmaking, also some points for the needle (illustrating 30 of the various styles of stitches), all valuable hints to the home dressmaker.

Motordom's
Greatest AssetCooperation Between Manufacturer,
Dealer and Owner Comes First, in
Opinion of American Automobile
Association President.

Placing the development of cooperation between automobile manufacturer, dealer and owner above all other assets of motordom as the industry celebrates its silver jubilee throughout the country, the American Automobile Association predicts a new type of success for motordom in a bulletin just issued from its national headquarters in Washington.

Cooperation has been the keynote of motoring's amazing growth in America, the bulletin points out, and it is the automotive asset which assures the country of a definite solution to the many problems which are temporarily clouding the horizon.

According to Thomas P. Henry, president of the A. A. A., the automotive business stands first in cooperation between producer, retailer and consumer. This, he says, is the result of successful organization efforts on the part of the three human factors in the industry.

"What the manufacturers, the dealers and the car owners could not do individually in the way of cooperation they have done, and are doing, through organization," Mr. Henry declares. "This is the day of organization, and nothing proves it more than the three leading automotive organizations—that are helping the whole of motoring 'get together.'"

"Through the National Automobile Chamber of Commerce automobile manufacturers have been enabled not only to cooperate with each other in the solution of industrial problems affecting motordom, but to cooperate with their dealers and their consumers. The National Automobile Dealers' Association untangles the problems that would otherwise result in increased costs, poor service and 'orphaned' cars. The American Automobile Association completes the picture by helping the motorist use and enjoy his car."

"These organizations, sifting out the most practical ideas and suggestions from their large memberships, are able to offer to each other the most concrete form of assistance. Thus we find the N. A. C. C. co-operating in an effort to solve the accident problem, the N. A. D. A. co-operating in an effort to stabilize the retail trade to the advantage of all, and the A. A. A. uniting its affiliated motor clubs into a coast-to-coast touring service unparalleled in the history of transportation."

"It should be obvious to the motorist that the success of such cooperation rests very largely upon association strength. The stronger these associations are the quicker our motoring problems will be solved. The day has passed when the individual car owner can expect to see progress through individual conference with individual members of the industry or the trade."

"In addition to all the direct benefits which a car owner receives in the way of touring information, legal advice, emergency road service, licensing, etc., when he joins his local automobile club he automatically obtains the cooperation of those who make and sell the cars he buys. It is organization that makes this cooperation possible. It is the big motor asset of the day, and the most effective thing any car owner can do during 1925 is to seek to enlist the help of other car owners in making it still greater."

The immediate benefit received by the motorist from national organizations is realized when it is known that the manufacturers' association with its cross licensing agreements and co-operative measures which guarantee more car value as time wears on, works with a national dealers' association which is constantly improving sales and service, and both in turn work with the one national owners' association which improves motoring conditions, reads maps, touring and emergency road service and watches the legislative interests of the individual owner.

New and Still Lower Prices Greater Values Made Still Greater

Reductions are announced in the prices of good Maxwell models, coincident with the advent of the new Standard Sedan.

The new good Maxwell has long led in value all other cars in its field, because as a dollar-for-dollar buy its quality could not be equaled. Not only in performance and riding qualities does it surpass all fours, but these new and lower prices now make it a better investment than ever before, and great values are made still greater.

The New Maxwell Prices

Touring Car	\$895
Club Coupe	995
Club Sedan	1045
The new Standard Four Door Sedan	1095
Special Sedan	1245

All prices F. O. B. Detroit, Tax extra.

What's Left Sale Ends Saturday This Week

Forestry Lecture At "Y" Tonight

An interesting illustrated lecture on forestry will be given at the Y. M. C. A. this evening at 8.15 o'clock. W. A. McDonald, the speaker, is in charge of the College of Forestry at Syracuse University and is now making a tour in the different states on the subject of forestry. Great interest has been shown in many of the states in the study and further knowledge of this interesting subject. The lantern slides which Prof. McDonald uses have been made from a careful selection of thousands of the best slides available. Prof. McDonald handles the matter in such a way that the occasion may be made very enjoyable as well as exceptionally profitable. All men of Kingston are cordially invited to be present and hear him. His address is one that appeals to all. Prof. McDonald is making special effort to come to Kingston and in as far as possible it is hoped that the men who are at all interested in the subject of forestry will be present this evening.

Sanitary Squad Holds Banquet

The third annual banquet of the Sanitary Squad of the New York City Board of Water Supply was held at the Schaffer House at Grand Congo on Saturday evening, January 17. The tables were tastefully decorated with cut flowers and small place cards served to designate the individual seats. A full course dinner was served under the personal supervision of Mrs. S. N. Murphy which was par excellence in every detail and the service could not be improved. Not only did the entire squad respond but many former members and their friends rallied to the festive occasion, and aided in making it a party long to be remembered.

No fixed speeches were in order but each and every member was given an opportunity to tell his own favorite story. While the work of the squad often has its unpleasant side and is not always what members could wish for, yet it is often the case that these same experiences become very humorous and the occasion for many a hearty laugh as time goes on and the unpleasant details are forgotten.

While this may be the last dinner for the squad as it is now organized, the good times will long be remembered and the songs, stories and games will have served their purpose.

World-Famous Painting

The famous painting of Christ believed traditionally to have been begun by St. Luke and to have been finished supernaturally has been, as a preliminary to the celebration of the Sixteenth century of the foundation of the Basilica of St. John Lateran, Rome, removed to the Basilica from the Sanota Sanctorum, adjoining the Basilica, where it usually is enshrined. The ceremony last took place in 1913 on the occasion of the centenary of the edict of Milan, and previously in 1900, the last holy year. It will also be exhibited next year, which has been declared a holy year.

Defrauding His Public

"Oh, oh, oh—terrible, awful!" groused the chief broadcaster of station WOOF as, tired but presumably happy, he returned to the bosom of his family after the evening program. "What's terrible? What's awful?" demanded his ever-ready helpmeet.

For some moments the broadcaster of station WOOF was unable to speak. Then, slowly lifting his tortured face, he said: "Dearest, I—I forgot to say 'Good night' tonight when we signed off."—L.H.

Still Unsolved

The sport desk telephone rang. "Say, listen," said an anxious voice. "Did John L. Sullivan ever whip a man whose name was in four letters and ended in A?"

"I guess he did if he fought him," replied the office boy. But the puzzle went unsolved.

Plenty of Officials

In Nova Scotia, with half a million population, there are 10,000 government officials.

"KING OF IVORIES" LEAVES PRISON

Snodgrass was released from the Missouri State Prison, in Jefferson City, and returned Harry Snodgrass, serving a long term for burglary. Snodgrass, who was known as "King of the Ivories" by radio fans because of his ability as a singer, walked out of the prison two weeks after the wife and child of his wife, who was responsible for introducing Snodgrass to the ivories business. He also had a check for \$1,000, gift from the state prison authorities, after his last concert at WOC where he is shown, in concert with, playing his last selection.

War Hero Is Jailed As Filibusterer.

DR. W. F. LORENZ.

Dr. W. F. Lorenz, chairman of the Wisconsin State Board of Control, is reported to have been jailed at Progreso, Mexico, by order of the Captain of the Port. Major Lorenz, a hero of the World War, was wrecked on an American sailing vessel, the "Ruth," while on a fishing trip, and the entire crew was arrested as filibusterers.

Kansas Commissioner Asked to Resign.

CARL J. PETERSON.

Carl J. Peterson, State Banking Commissioner of Kansas, has been asked by the Attorney-General to resign his post. Peterson is alleged to be involved in the parole and prison pardon scandal in which ex-Governor Jonathan M. Davis and his son, Russell, were arrested in Topeka on the last day of Governor Davis's term. It is alleged Peterson demanded \$4,000 for securing a parole from prison for Walter Grundy.

REAL ESTATE TRANSFERS.

Deeds Recently Recorded With The County Clerk.

The following deeds have been filed in the Ulster county clerk's office:

Frederic A. Baker and wife to Eli LaForge, a property in the town of Shawangunk. Consideration \$1.

William Coy to Eber H. Coy and wife, several tracts of land in the town of Plattekill. Consideration \$11,500.

Will Locate and Mark Illinois Heroes' Graves

The military and naval department of the state of Illinois is compiling a record of the burial places of all soldiers, sailors, marines and army aviators of all wars who are buried in Illinois. The plan is to mark every grave appropriately and to aid patriotic organizations to locate and decorate graves on memorial days. The American Legion, department of Illinois, has been asked to assist in locating unmarked graves of veterans and to send in the locations of all marked graves so that the exact spot of every ex-service person's grave in the state may be charted. The United States government furnishes headstones for graves of its war dead upon request.

Name Governor's Son in Bribe Scandal.

RUSSELL G. DAVIS.

Russell G. Davis son of ex-Governor Jonathan M. Davis, of Kansas, was snatched in a Topeka court, where he and his father appeared, on the Governor's last day in office, to answer to charges of selling a pardon to Fred W. Pollman, convicted banker, for \$1,250. Both denied their guilt.

Sticks to Husband Who Robbed Mail.

MRS. J. W. CADOO.

When James Watt Cadoo, son of a millionaire Lynbrook, Long Island, N. Y., lumber dealer, was arrested, charged with being the lone bandit who held up a Long Island Railroad mail car and escaped with \$10,000 in registered mail, he confessed, declaring he stole the money to show his wife he had been making good in business. His young bride declares she will be at the prison gates to meet him when he fulfills the term he will get later.

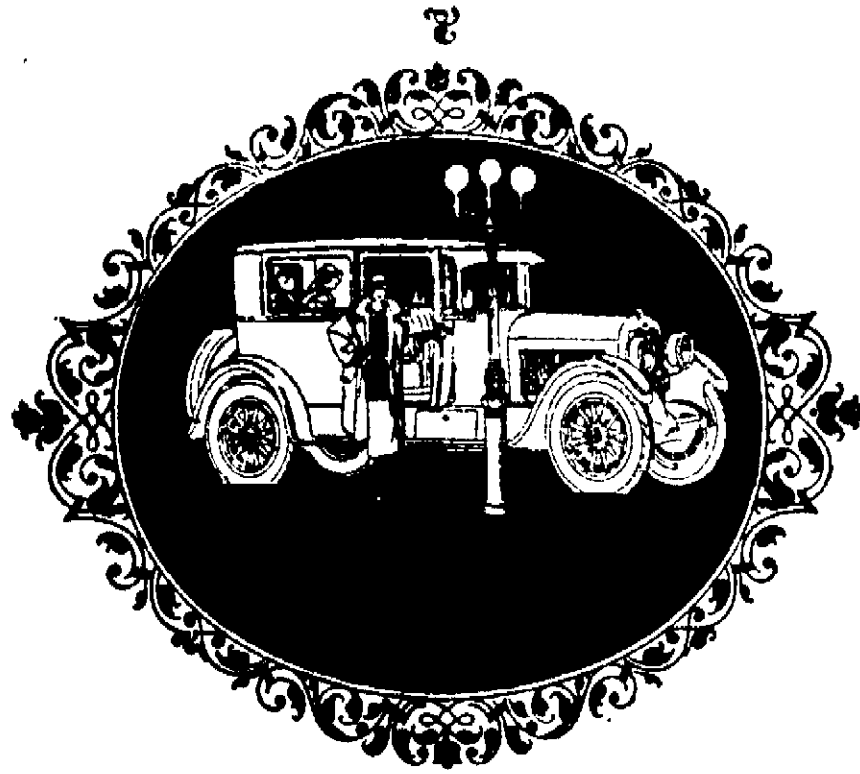

Former Mrs. Spreckels Named by Princess.

PRINCESS ELIZABETH DE RIDDER.

Princess Sand, the former Mrs. Edith Spreckels, of San Francisco, has been named as co-respondent in the Constantinople divorce action of Princess Christel, of Egypt, against her Turkish husband, Captain Selim Bey. Princess Christel alleges Princess Sand was jacking along with Captain Selim. Princess Sand divorced John D. Spreckels in California in 1912, alleging cruelty. He died several months later and Mrs. Spreckels married Prince Sand, of Turkey.

Senior Y. M. C. A. League Notes

The last game of the first half of the Senior Basketball League was played on the Y. M. C. A. court Monday evening, resulting in a win for the Celtics and giving them third place in the league.

Johnson and Fitzgerald played wonderful basketball, being responsible for a total of 14 of the 18 points scored by the Celtics, while Meeker, Gross, Murray and Fein did all the scoring for the Yankees. When the whistle blew at the end of the fast second half the score was: Celtics, 18; Yankees, 15.

Yankees.			
	FG.	FP.	Tot.
K. Hartman	6	0	0
Fein	1	2	4
Murray	0	1	1
Gross	0	1	1
Meeker	3	2	6
Total	4	7	16

Celtics.			
	FG.	FP.	Tot.
Johnson	3	2	6
Yallum	0	1	1
Winn	0	0	0
Stock	0	2	2
Fitzgerald	3	1	7
Total	6	6	18

Score at end of first half—Celtics, 10; Yankees, 6. Referee—A. W. Bukey. Umpire K. Wood. Scorer—R. Leonard. Timer—E. McLane.

Deciding Game Tonight at the Armory Court

Fifth Game of Series Between Original Celtics and Kingston Tonight.—Record Crowd Expected To See Championship Battle.

The Original Celtics, claimants of the World's Championship in professional basketball, meet the Kingston team of the Metropolitan League, at the local armory court tonight. This is the fifth and deciding game of a series between these teams, which may rightly be called a championship affair.

At present we will not take issue with the Furey aggregation on the grounds that they hold the World's Championship, but the result of tonight's contest will be cause for some consideration. The Celtics have been playing basketball throughout the country for a number of years and always conclude a season with a splendid record. The strength of the Celtics is not disputed entirely, they are a remarkable team composed of skilled players.

Beckman and Holman are and have been for a number of years considered the court's best players, possibly this is so. Leonard and Delbert, members of the Shamrock Wearers, are very good guards and have been mentioned by authorities. If any, on the court game, Joe Lopechik, who jumps center for the Celtics, has been a member for but a short time, but his work at the pivot position has been noticeable. The Kingston representatives won the first half championship of the Metropolitan League, which entitles the Morgenweckers to some consideration in basketball circles. In the four games played with the Celtics so far this season the local representatives broke even. This record also entitles the Morgenweck squad to no little honors.

Carl Husta and Harry Riconda, now leading the Metropolitan League in scoring, will cause the Furey Stars the most trouble. Husta and Riconda have been in the games against the Celtics this year and both have made good showings. George Artus and Charlie Powers have also played in the previous contests and know what they are up against. M. Husta and Tomo will also be available for tonight's game. A record crowd is expected to see the game this evening, as a large number of tickets have been sold in advance. Additional seats have been placed in the large drill shed to accommodate the crowd.

KLANKS BEAT HORNETS OF EAST KINGSTON.

The Hornets of East Kingston were defeated by the Klank All Stars, a team under the management of John Klank, on the East Kingston court by a score of 34 to 20. J. Sweeney and J. Scully were the highest scorers of the evening, having 13 and 14 points respectively. While Tuney was highest for the losers with 9 points. The score:

Klank All Stars.			
	FG.	FP.	TP.
J. Scully, Jr.	6	2	14
J. Sweeney, Jr.	6	1	13
R. Perry, Jr.	1	0	2
J. Graney, Jr.	2	0	4
L. Doherty, Jr.	0	0	0
J. McDonald, Jr.	0	1	1
Total	15	4	34

Hornets.			
	FG.	FP.	TP.
Hiano, Jr.	0	2	2
Marino, Jr.	3	0	6
Tuney, Jr.	3	2	9
Fay, Jr.	0	1	2
Total	6	5	20

Score at end of first half, Klank All Stars, 15; Hornets, 11. Timer, John Klank. Scorer, McNally.

WERNER LOOKED THE BETTER, BUT GOT A DRAW.

In the ten round semi-final bout Tuesday evening, at the Knickerbocker Athletic Club, Albany, Joe Werner of this city and Jerry Williams of Albany battled to a draw. The fans booed the decision, Werner being their favorite. There was considerable dissatisfaction over the decision and the main affair was held up for some minutes. From start to finish Werner had the best of the affair on points, getting in body punches that drove Williams to the ropes. Williams landed but once, coming in the third round, when he hit the local welterweight on the button, sending him to the ropes. Werner quickly covered up and was going strong at the bell.

CLAYTON SENIORS MEET FIRST DUTCH QUINTE

Tonight in Epworth Hall there will be one game of basketball when the Clayton Avenue Seniors meet the First Dutch. The game will start promptly at 7 o'clock. The line-up: C. M. A.—Dietz, Slater, J. Schenck, maker, rg.; Chipp, c.; Snyder, rf.; Hyatt, lf.; First Dutch—Zelle, lf.; R. Miller, rg.; B. Miller, c.; Slater, rf.; Hauser or Irwin, lf.

Normal Expected Ninth Street.
By Telegram to The Freeman.
New York, Jan. 21.—Pauze Normal will stage another duel with Father Time tonight. The great film will go after the 2½ mile record of 12:04.55 tonight at the gates of the St. Joseph Catholic Club, Newark, and confidently expects to smash his sixth world's record since starting competition in this country several weeks ago. Normal will be opposed by a group of his countrymen including Bruce Price, Gus Fager, Gunnar Nilson, Carl Wilberg and L. Turkhanen.

Greatest Jockey Is Convalescing

Earl Sande, plucky little jockey who was badly injured last summer when he was thrown at Saratoga, photographed with his wife at Cambridge, Mass., the home of his wife's parents. Sande expects to be able to ride again during 1925.

Training Jockeys Is Work of Fitzsimmons

Jim Fitzsimmons, the veteran horseman, known on all the major race courses of America as "Sunny Jim," has developed more jockeys than any other horseman in the country. He conducts a school for riders at Aqueduct, where between twenty and forty applications for jobs are on file each year from youngsters who want to become jockeys. His latest developments are Peter Wallis and Johnny Dawson.

Star of Minnesota

Clarence Schutte, forward of the University of Minnesota basketball team. Schutte is remembered as a leading factor in Minnesota's spectacular victory over Red Grange and his teammates from Illinois, spoiling Illinois' chances for a Big Ten football championship.

Sporting Squibs

Yale baseball nine will play 27 games during 1925.

The Toronto Hockey league will include about 200 teams this winter.

Jack Bentley's pitching motion is the most deceptive part of his delivery.

The prince of Wales recently entered an amateur squash racquet contest in London.

Philadelphia Skating club, the first in the United States, was founded just 75 years ago.

Ninety-five per cent of Western university's student body is taking part in outdoor athletics.

Soccer, now listed among the most universally played games in the world, had its first real introduction in the United States 40 years ago.

Kaute Reckne, the real miracle man of modern football, was born in Norway, but is looked upon as a native of Chicago, as he grew up there.

The "Four horsemen" will graduate from Notre Dame and be lost in the football team, but Reckne probably can get a flock of tractors to take their places.

Arrow golf is the name given to a new sport which combines golf and archery. It is played over a regular golf course, shooting with bow and arrow into cardboard disks.

Earl ("Greasy") Neale, coach and scout for the Reds, has been given a two-year contract as coach of the University of Virginia football team. He had a successful year with the Virginia eleven this fall.

All-American Field and Track Team by Rubien

(By Davis J. Walsh.)

By Telegram to The Freeman.

New York, Jan. 21.—There will be weeping and wailing and grinding of the incisors by certain young men of the spiked shoe profession when they give Frederick W. Rubien's All-American track and field team, announced today, the optical left to right.

Mr. Rubien, as secretary-treasurer of the A. A. U., can be said to have his index finger on the pulse of the situation at all times, yet some of his selections are not quite open to comprehension.

By nightfall, for example it is possible that De Hart Hubbard, University of Michigan negro and justifiably proud of his broad jumping ability, may be one of the four out of five who masticate with the bare gums. Hubbard beat 24 feet more times than any jumper in the world last year, and as far as my knowledge goes, finished the season undefeated. He won the Western conference title, the Olympic tryouts at Boston, the Olympic itself at Paris and finally the national championship.

Was he named as the best broad jumper in this country? He was not. The place went to Bob Legendre, Newark A. C., who broke the world's record by clearing a fraction more than 25 feet 6 inches and then called it a campaign.

Legendre was beaten by Hubbard, Ned Gordin, W. Dowling and Al Rose at the national meet, in fact, failed to place at all. Hubbard may be placed by the fact that he was named as the best in the hop, step and jump, but I doubt it. The event lacks consequence.

Another selection that may bruise the finer sensibilities of our hardy athletes is that of Horatio Fitch, Chicago A. A., in the quarter mile. Horatio came along like the wind at the Olympic games, and in addition to breaking the record in his heat, chased Eric Laddell right into another new mark in the 400 meter finals. Then, he stopped in his tracks. He made a poor showing at the United Kingdom versus America games in London and followed it up by finishing to the rear of Jimmy Burgess, G. T. Stevenson and Cliff Stowers at the national championships.

Apparently, Horatio staked himself to one big shot and then found himself without ammunition. At the same meet, Cerne Booth, former Johns Hopkins entry, ran third behind Ilmar Prim and George Lemmond in the five mile run. Yet Booth got the place in Rubien's selections. Until he ran 9:23 for two miles the other night. Booth has done nothing of moment since leaving college.

With Willie Ritola, not considered because he spent most of the campaign abroad, Gunnar Nilson was named as cross country king. The Gunnar was beaten for the national title by Fred Wachsmuth, but I presume he must have been deemed to have shown the greater consistency throughout the campaign.

Jole Ray's recent running leaves no doubt that he still is the great miler in America, but for obvious reasons, he is not named for the place for the first time in many years. Ray had a poor season, outdoors, and the nomination rightly goes to a team mate, Ray Buker. Jole is placed by being named for the two mile distance.

The remainder of the selections are quite judicious. The four leading sprinters are taken care of with Bowman at 60 yards; Paddock at 100 yards; Scholz at 220 yards and Murchison at 300 yards. The three greatest hurdlers in the world follow with Dan Kinsey at 130 yards, Charley Brookins at 220 yards and Morgan Taylor at 440 yards with Herb Meyer stepping in for the place at the 70 yard distance.

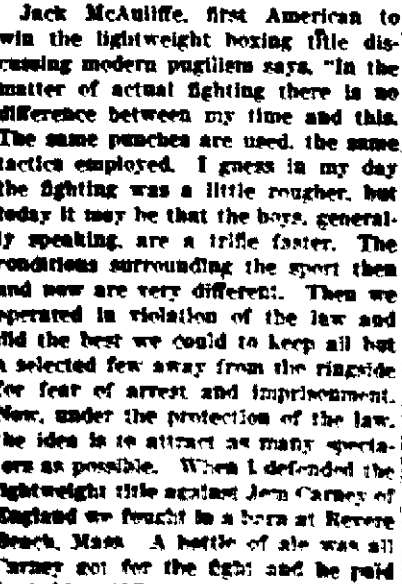

Others named include Alan Half-rich, 600 yards; Schuyler Enck, 880 yards; George Marsters, 1,000 yards; Earl Johnson, 10 miles; Marvin Rick, steeple chase; Clarence De Mar, Marathon; William Plant, one mile walk; Harry Hinkle, seven mile walk; W. I. Reed, standing broad jump; Harry Schweitzer, standing high jump; Harold Osborn, Houser, shot put; Matt McGrath, 56 pound weight; Tom Lieb, discus; Fred Tootell, hammer; Eugene Oberst, javelin; and Bob Legendre, pentathlon.

Medals for Major Leaguers.

By Telegram to The Freeman.
New York, Jan. 21.—"Sparrow" Robertson, sport critic and promoter, here from Paris to arrange details of the proposed Kaplan-Mascart bout, stated today that he had been commissioned to present medals to John J. McGraw, Charles Comiskey and all members of the major league teams that toured Europe several months ago. The medals are gifts of the French government.

With Willie Ritola, not considered.

New West Point Coach

One Old Timer Relieves Modern Boxers Are O. K.

Jack McAniff, first American to win the lightweight boxing title discussing modern pugilism says, "In the matter of actual fighting there is no difference between my time and this. The same punches are used, the same tactics employed. I guess in my day the fighting was a little rougher, but today it may be that the boys, generally speaking, are a trifle faster. The conditions surrounding the sport then and now are very different. Then we operated in violation of the law and did the best we could to keep all but a selected few away from the ringside for fear of arrest and imprisonment. Now, under the protection of the law, the idea is to attract as many spectators as possible. When I defended the lightweight title against Jim Carney of England we fought in a barn at Revere Beach, Mass. A bottle of ale was all Carney got for the fight and he paid for it himself."

Baltimore Keeps Boley

Jack Boley, manager and owner of the Baltimore Internationals, says that Joe Boley, his star shortstop, will not be sold, and that Boley has signed a contract for this year. He had considered parting with Boley, the Orioles' leader added, and had named a price to the New York Yankees "at their request," but they failed to answer their offer. He had, therefore, decided to keep him.

New Auditorium Theatre

B'way and Pine Grove Ave. Jacob Moffett, Musical Director.
Performances 2:30-7:30 p. m. Admissions—Adults, 25c; Children, 15c. Weekday Matinee—Adults, 20c; Children, 10c.

Tomorrow—Corinne Griffith & Conway Tearle in "Lilies of the Field."

History Worth Knowing

Frederick Mathushek, the founder of the Mathushek Piano Manufacturing Company, was born June 9, 1814. Before he reached the age of seventeen years he had made several improvements in pianos. In 1840 he came to America, where he devoted his life to the manufacture and improvement of the pianoforte. Unusually he has given to the world the benefit of his wonderful inventive genius, for many of his valuable inventions were not patented, but were embodied in the best makes of pianos throughout the world.

The following are a few of the inventions which have made the name "Mathushek" famous:

Circular Scale	1849	Mammoth Grand	1865
Overstrung System	1849	Repeating Action	1870
Hammer Covering Machine	1850	Upright Piano Square Action	1871
Repeating Action	1857	Block Pin Arrangement in Double Sounding Board	1873
Lifting Hammer Rail	1858	Equilibrum System	1879
Harp Form Parlor Grand	1860	Improved Bridge and Agraffe	1896
Orchestra Piano	1862	Arched Bridge, Patent Ap	
Colibri Piano	1864	plied for.	

The long life of Mathushek Piano is attributed to its distinctive scientific metal plate and requires less tuning than any other instrument.

Mr. A. E. Thomas of 297 Wall street has the agency in Ulster County for this wonderful instrument.
